

Mother's Day Card

What you'll need:

- Free Printable Template
- Scissors
- Pencil
- Glue
- Coloured Cardboard

Instructions:

1. Print & Cut

Print the template out on regular print paper. You could also print it on heavier print paper and color in all the parts to use in this project.

If you decided to use the template, cut out the hearts, flower, leaves and stem. You can also roughly cut out the bees to add extra cuteness.

2. Trace & Cut

Trace the hearts, flower, leaves and stem. Because we used cardboard, we traced 3 flowers, however if you're using thinner paper, you can use more.

3. Glue the Hearts

Glue the smaller heart in the middle of the bigger heart.

4. Flower & Leaves

Fold the flowers in half and glue their sides together. Glue the stem and leaves in the small heart. Once done, fold the card in half and then glue the flower on top of the stem.

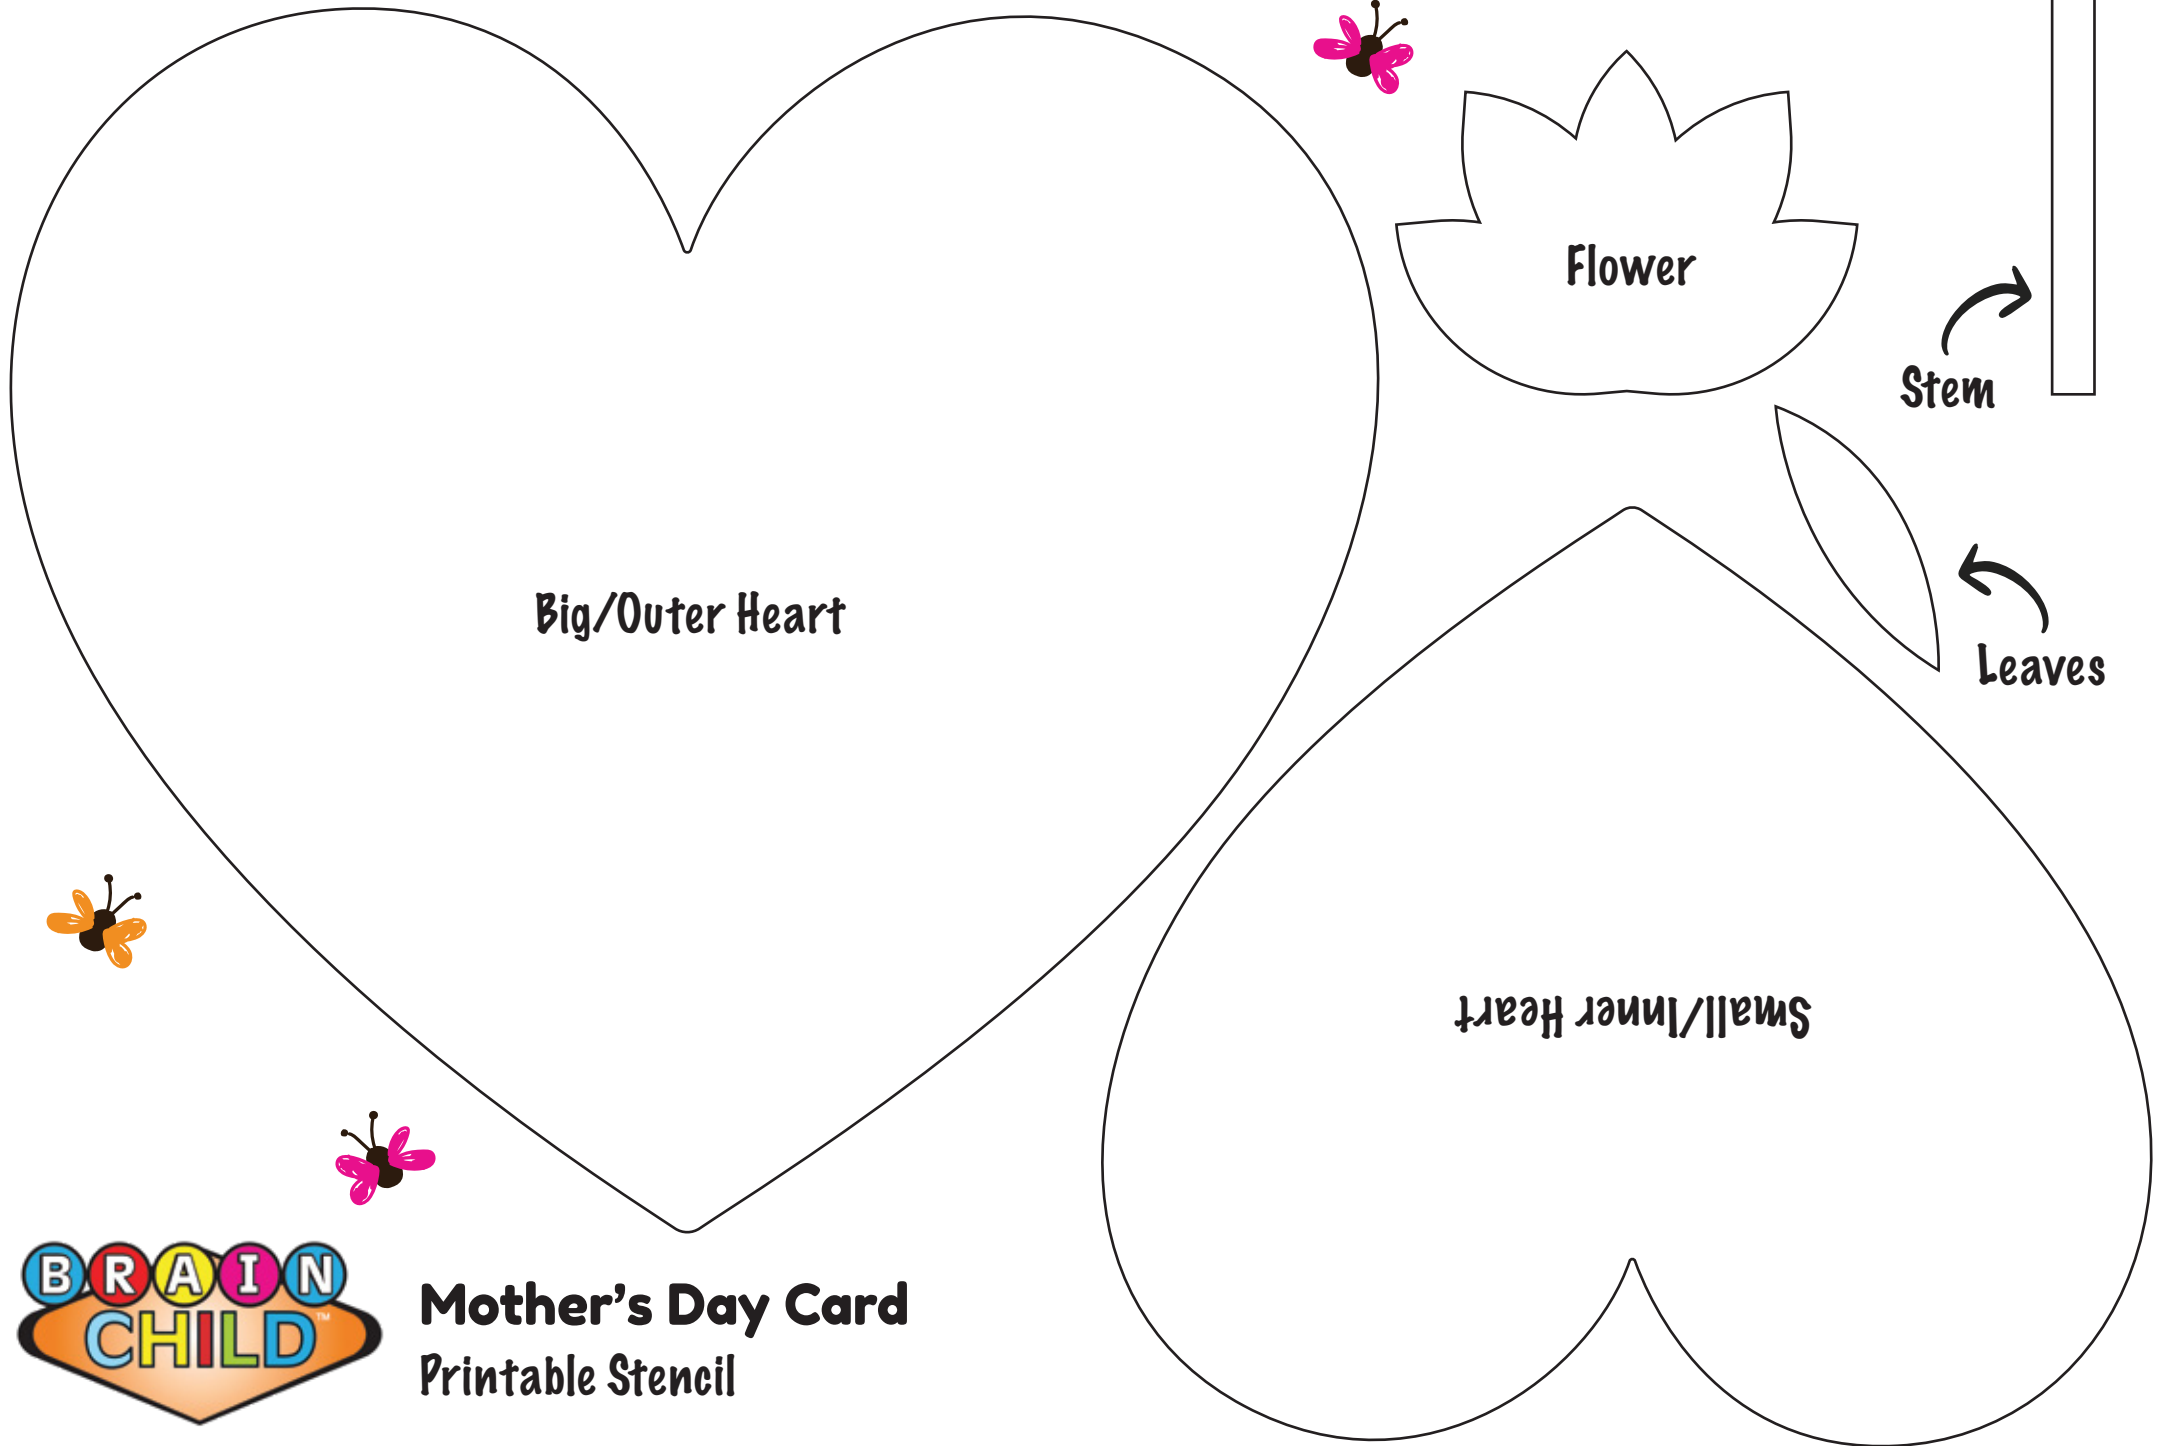

5. Finish your card

Finally, glue the bees next to the flower. Remember to write a special message for mom and most importantl, have FUN!

Supplement your child's growing mind & body!
