

How to make SLIME...

What you'll need

1/4 and a pinch Borax Powder

(Remember to clearly mark your Borax Powder once you are done, as it is a poisonous substance)

1 Cup Clear Glue or 2 x 118ml Bostik Paper Glue bottles

250ml / 1 Cup Hot Water

Glitter

How to Make Slime:

Ad 1/4 and a pinch of Borax Powder to a plastic glass. Pour 1 Cup of hot water into cup. Mix well.

Empty glue bottles into a mixing bowl.

Pour some of the Borax mixture into the glue. Mix with a spoon in an upward direction. Repeat until the Borax mixture is finished.

Your slime should be fun to play with now and shouldn't stick to your hands anymore.

For an extra sparkle, ad some glitter.

Supplement your child's growing mind & body!
